EXTREMIST
FORUM

THE UNSEEN
EVIL MANUFACTURED
TO SUBSUME YOUR
VERY SOUL

AI IS PATTERN RECOGNITION AND REPRODUCTION SOFTWARE USED IN FACIAL RECOGNITION, LICENSE PLATE READERS, IMAGE AND TEXT GENERATION, YOUR SOCIAL MEDIA ALGORITHM, AUTOMATED POLICE PROFILING AND MORE.

We carry pocket trackers. Spies peek through the cameras we have jammed into every corporate produced computer. Programs aggregate not just our specific data, the content of the messages, images and calls, but our METADATA. When we speak, who we speak to, how long, where and where to. This data is connected in an infinite web of surveillance and tagged using AI pattern recognition to be presented to a boardroom in a presentation titled: "how we use big data to capture the market". The software and it's data is sold to police, military, ICE and every government and private interest with enough gold. We are sold not as thinking, feeling people who are born and die but as products, consumers and targets to be traded like socks and shoes.

YOU MUST BE AN EXTREMIST OR THE WORLD WILL MAKE YOU A SLAVE.

We must radicalize. We must embrace extremism. We must get into bed with the revolution against technological control. The government and corps sit together on the same panel: private corps hook up AI trained cameras across cities and license them to government and private police departments. These cameras track every aspect of the car and its driver. Cities hire private police companies to patrol their streets. Automated bots post propaganda on every social media platform. Every movement is logged and distributed like spoiled communion wine to a corrupt congregation.

WE ARE FARM ANIMALS TO CORPOS, BELOW THEIR NOTICE, ONLY THERE TO BE EXPLOITED FOR PLEASURE AND POWER.

THE ERA OF CORPO POLICE AND AUTOMATED PROPAGANDA IS HERE. NO PLACE ON THE STREET REMAINS UNDOCUMENTED. NO CORNER ESCAPES THEIR GLASS EYES. NO SPACE UNTOUCHED BY THEIR LIES.

More nefarious than ChatGPT are the bots we are not allowed to see. The algorithms hidden behind veils of closed source code and obfuscated design. Facebook and Youtube and Google aggregate your patterns and reproduce what they have learned keeping you hooked to the screen, and create a data package to sell to governments. They do not tell you that this is the doing of bots, that the surveillance cameras operate on the same logic as ChatGPT, but pretend their services are simply the equivalent of a waiter suggesting their specials. What we have called 'the algorithm' is just another software bot, no different than the Israeli Occupation Force's facial recognition tech, just as fallible as ChatGPT, and just as susceptible to the whims of evil.

THE CORPOS DO NOT WANT PEOPLE. THEY CANNOT STAND LOVE. CORPOS WANT ONLY CONSUMERS, ONLY UNTHINKING SLAVES, ONLY DEPENDENT EMPLOYEES, ONLY LIVES TO TRADE FOR POWER.

Landlords coordinate your data to make your rent just high enough to keep you one paycheck from the streets. With all the force of a firearm to the skull, they will edge up the price of milk and bread so that every hour worked is indispensable for your survival. They will make beggars of us all because they have replaced our need for love with a need for money. They have supplanted the human desire for compassion and harmony with a conditioned infatuation with money and plastic pieces of shit. If they could get away with it, they would implant chips that force our eyes open to advertisements, that shock us when we try to rest a moment, that poison our bodies for the low low price of \$89.99 a month.

The AI Corpos are in the software industry but their market tools are emotional manipulation. Their data enables them to best determine how to manipulate you. It's most popular as a chatbot you talk to, but is being used in growing numbers to impersonate people online for political ends. It was already well documented by the hacking community that nation states utilized human bot farms for propaganda and social sabotage. Now, corpos peddle to nations to replace teams of humans with AI bots that churn out fascist propaganda faster than you can breathe.

"THE CONVEYOR BELT DID TERRIBLE THINGS TO WORKING CONDITIONS. IT FURTHERED DIVISION OF LABOUR INTO MEANINGLESS, DULL AND REPETITIVE STEPS AND THEREBY ISOLATED AND ESTRANGED US FROM WHAT WE CREATE."

In the hands of corporate interests, all technology is a weapon.

This is what every corp has been yearning for: how to best keep you controlled, how to best manufacture the emotions that keep you consuming, how to best exploit you and your loved ones, how to turn around and sell information and digital weapons to cops, the military and ICE.

THERE IS NO END TO WHAT THEY WILL DO IN PURSUIT OF PROFIT, NO END TO HOW THEY SEEK TO ENSLAVE US.

They will make their recommendation algorithms so advanced and keep us so stressed we cannot help but reach for the easiest relief: the slop feed. They will drive a wedge between you and everyone around you: speak only through the machine and ignore the beating of your heart. Hear no voice but the voice of a commercial golden idol urging you to isolate, break off, consume and spiral. Do it all under the watchful glass eyes of the cops planning to black bag your cousin while another bot makes 2789 tweets an hour praising ICE.

BUT WHO ARE THEY? THEY ARE CORPOS THAT RUN AND WORK AT OPENAI, MICROSOFT, PALANTIR, GOOGLE AND OTHER CORPS. THEIR ONLY MOTIVATION IS GREED AND POWER. THE DEATH OF LOVE TO BE REPLACED WITH COMMODITY WORSHIP AND GOVERNMENT CONTROL.

They speak to one another as a moneyed cabal, united only in their pursuit of lines trending upwards and incalculable incomes. They are not united by faith or ideology or morality or ethnicity or country, only greed. Amazon asks you kindly to turn on Bluetooth and Location Data to access their lockers, leave it on they say, for convenience, so we can track you and better serve you what you want before you know what you want. They scribe your life into their servers to be run through their machines to be sold to other corpos to train their computer programs to manipulate you ever more efficiently.

LOOK UP AT THE CORPOS IN THEIR TOWERS, SELLING OUR VERY LIVES FOR ANOTHER COIN IN THEIR POCKET. THEY RELISH IN THEIR POWER OVER US.

We must remain vigilant against these invisible bots, these hidden algorithms that document and categorize our every move and feeling. The bots posing as people to get you to believe the homeless person collecting cans is a threat. These products are used to further control us, to maintain the power structures used to disappear our black and brown friends, to kick down the doors of radicals fighting for freedom. We must gouge out their glass eyes, cut the chords running off with as much data as their wasteland data centers can hold, and pull out the plug.

ACT UP AND FIGHT BACK AGAINST THE CORPOS USING THEIR WEAPONIZED TECHNOLOGY TO SELL OUR VERY LIVES OR WE WILL ALL BE GROUND TO DUST.

*the AI wars were supposed
to be an epic battle
between humans and the
robot army where we showed
the true power of the
indomitable human spirit . . .*

LETTERS FROM THE EDITOR

Hey there! Thanks for reading our little zine. We hope to use this publication as a means to create an active dialogue about creativity and humanity between us (the freaks) and you (the freaks). If you have any thoughts, feedback or whatever, don't be shy! We would love to hear from you. We will print our replies in the next issue.

Last week, an anonymous reader left a message saying: **"haiii :D"**
and we say:

"hiiiiiiiiiiiii! ^-^ thanks for reading friend!"

“MIC and AI and Ego”
by Kim
formatted for print by us

“Can't wait for Issue 2. I like the zine. Liked it so much I punched out around 200 words all about the Military Industrial Complex getting into bed with AI. Hope you use it.”

The Military Industrial Complex has opened their pockets and plan to turn LLMs into the next cold war. You can see them licking their lips as they try to carve up the next frontier. We cannot abide an AI gap they will say, as they pour billions into their corrupt cronies pockets.

The future of warfare is here. 28 billion says the Air Force. So they can teach a bot to kill for them from 30,000 feet. The Army want's an AI calling some dead soldier's mom to offer it's condolences. Frees up man power for the new war. Really gives it that human touch. Only home grown flesh can die for their country like that. Ukraine has taught them that communications can be broken.

Drones can't do everything for them. Now they need a killing machine that can hate for you when you're not there. Autonomous all terrain freedom coming to an impoverished playground near you. The cloak of protection, and all it takes is your identity. We need the data to feed the machine. The Data Centers will be the new front line. Opposing their growth will be treason. Standing against them will be terrorism.

Expect a knock at the door because the algorithm suggested a wellness check.

INDEPENDENT WEBSITE HIGHLIGHT

[real websites made by real humans]

The Internet was originally created by people with a wholesome and genuine desire to communicate. We believe finding joy and interest in the dark corners of cyberspace is essential in our battle against the machine. Every month we will pick out a cool, cute or useful website found outside the grip of the algorithmic hell to highlight.

FREAKSCENE.US

from their
about page:

“Freakscene is a community space for the DIY scene // music, art, zines, performance, whatever else people make outside the capitalist algorithms. If it’s underground, off-grid, or

self-made, it belongs here.

We’re a platform built by and for the scenes that already exist and thrive around the world.

We’re antifascist, antiracist, anticorporate. Our code of ethics is public and community-shaped. We believe in egalitarianism // all freaks are valued equally. Respect is expected. Actions matter.”

[CLEO SAYS FUCK POP MUSIC]

by the way, Cleo says fuck pop music

“One morning the well water was poisoned
what was once a bit harsh
came to rub off the skin of my mouth.

I had come to rely on our village well,
I had helped dig it of course
and fixed the bucket so many times.

Now a storm I couldn’t resist
had swept infection into our midst.

I longed and stared at its brackish hue
for the satisfaction it used to give me.

Now every sip was a gamble
on if I was committing to death.

I searched frantically for tablets
for shock for fire for purification
to cleanse our poisoned well.

But the storm has gone too deep
and the corpses now filled
every space between.

Packing the rucksack
reminded me of journeys long past
to distant plains and far off mountains
in search of natural springs
where we could sit naked by the pools
sheltered in caves from the sun
to sharpen stones and sing songs.”
